## languages

Polish mother tongue  
English fluency

## programming

♥ Python & Django

## about

I'm a computer addict who enjoys using *and* creating software that can be called objectively good (or as close to it as possible). I like tasks that are out of my comfort zone and the knowledge that comes with them. I believe good practices and attention to detail are very important in general and especially crucial in IT. I think humbleness and open-mindedness are one of the most important qualities a person can have. My antiheroes are Bender Rodríguez and David Brent.

## experience

- 10.16–Now **Omni Digital** Bristol, UK  
Part of fully Agile Python development team working with multiple big clients:
- NHS - Public health services of England, Scotland and Wales
  - 1610 - Gyms, Swimming Pools and Leisure Centres in the Southwest
  - UK Chamber of Shipping - Trade body for shipping in the United Kingdom, representing over 140 shipping companies
- I also worked on a bunch of in-house projects like company Ansible stack and the DevOps stack in general.
- 09.15–09.16 **Sidnet Solutions / Pythonity** Warsaw, Poland  
One-man Python development team member, working on a number of great projects, both commercial and open source:
- eZTK - Canola trading platform made for the biggest Polish distributor
  - Kolbe Poland - Official Polish site for Kolbe personality tests
  - Schedoodle - Team availability calendar
- I was also lucky enough to release some of the projects as open source software (listed in the *open source* section) and write for the company blog.
- 04–09 2015 **JMR Technologies** Warsaw, Poland  
Working on multiple projects as a core member of Python/Django part of the company, the most notable being:
- Fully multilingual and customizable product knowledge base
  - Batch user agreement generator that takes xlsx file and produces PDF files
  - Parcel tracking aggregator with multiple delivery companies connected

## education

- 2013–2016 **Warsaw University of Technology** University  
Majoring in Computer Science, currently on a break.
- 2010–2013 **I Liceum Ogólnokształcące w Zielonej Górze** High School  
Science class profile

## open source

- Icon Font to PNG - Python script for exporting icons from icon fonts as PNG images
- Ivona, Speak! - Python script that lets you convert passed text to synthesized audio files
- monz - Simple command line interface for quickly accessing your Monzo account
- fakester - Rickyroll your boss while preserving the element of surprise
- Multiple other small projects and contributions to various open source projects on GitHub
